

1. Scan forehead temperature. If 100.4° or higher, no admittance.

2. Do you have any of the following symptoms? If any, no admittance.

- Recent loss of taste or smell
- Fatigue
- Loss of appetite (skipping meals)
- Nausea or vomiting
- Cough
- Shortness of breath or difficulty breathing
- Fever
- Chills or repeated shaking with chills
- Sore throat
- Diarrhea

3. Have you been diagnosed with Covid-19 in the last 60 days?

- If yes, have you recovered according to the following criteria?
 - No fever for at least 3 days since recovery (without the use of fever-reducing medicine) AND
 - Other symptoms have improved (e.g., coughing, shortness of breath) AND
 - At least 10 days have passed since first symptoms
 - If you can answer yes to the above three criteria, continue to the next question: otherwise, do not enter the Kirk. (Note: a negative Covid-19 test is not a substitute for meeting these criteria.)

4. In the last 14 days, have you been in close contact (within 6 feet for more than 10 minutes) with someone who has been diagnosed with Covid-19?

- If yes, has that person recovered according to the following criteria?
 - No fever for at least 3 days since recovery (without the use of fever-reducing medicine) AND
 - Other symptoms have improved (e.g., coughing, shortness of breath) AND
 - At least 10 days have passed since that person first had symptoms
 - If you can answer yes to the above three criteria, continue to the next question; otherwise do not enter the Kirk. (Note: a negative Covid-19 test is not a substitute for meeting these criteria.)

5. In the last 14 days, have you been in close contact with someone who has symptoms of Covid-19? If yes, no admittance.
